wafting up from paving operations along a road in the summertime.

"That means a lot of energy is required for major paving operations. And the smoke is not good for the environment or the workers," Wen told me. Using different mixtures, Wen's group is researching materials that need

only be heated to 200 or 220 degrees. That's a significantly lower temperature that allows for real energy savings. As an added bonus, the blue smoke isn't produced at those lower temperatures. Wen's research is funded both by government agencies and industry. And although he's glad to be working

in this country, he still goes back to China to collaborate with engineers there. "They are doing a lot of paving in China now," he said. "The economy is booming."

Dr. E. Kirsten Peters, a native of the rural Northwest, was trained as a geologist at Princeton and Harvard.

Dept. of Revenue seeks volunteers for alcohol/server training classes

The Montana Department of Revenue's Liquor Control Division is seeking volunteers to help implement Let's Control It, the agency's training program for responsible alcohol sales and service. The volunteers would provide training to Montana liquor license holders about the state's requirements for selling and serving alcohol.

"In the past five years we've relied on volunteers to conduct our trainings and we really appreciate their efforts and the time they invest," said Department of Revenue Director Mike Kadas.

Interested individuals can find the application and

supplemental questions, along with the trainer criteria, at AlcoholServerTraining.mt.gov under the Alcohol Server Training tab at Liquor Education, or call (406) 444-4307 to request one in the mail. The department is accepting applications and supplemental questions until March 24, 2014. People can mail their completed applications and supplemental questions to Department of Revenue, Liquor Control Division, Education Unit, P.O. Box 1712, Helena, MT 59624.

"Our agency strives to ensure that liquor licensees have the knowledge and skills they need to ensure public health and safety

and to stay in compliance with the law," said Lisa Scates, alcohol education coordinator for the Liquor Control Division.

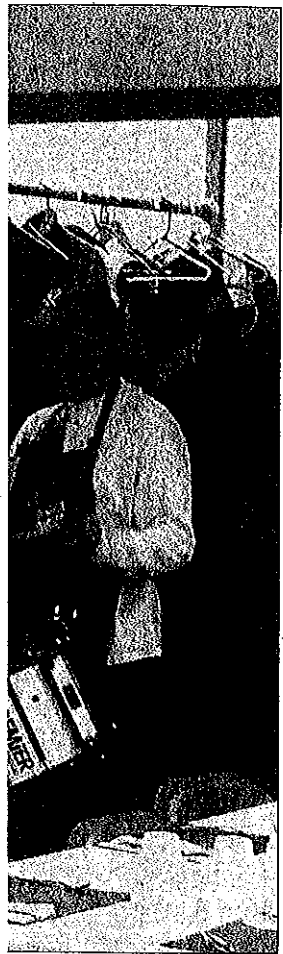

For more information, call Lisa Scates at (406) 444-4307 or send an email to LiScates@mt.gov.

NOTICE

Atlantic Richfield Company, by contract with Wasley Excavating, will be conducting Superfund related remediation activities as required by US EPA on property adjacent to and within the Old Works Golf Course in Anaconda, Montana.

Work will affect traffic on MT-1 and Arbiter Plant Lane. It is anticipated to begin as soon as the week of December 9, 2013 and will be completed in April 2014.

Work will involve heavy trucks hauling along MT-1 and
